FIBRE OPTICS IN HARSH ENVIRONMENTS CONFERENCE

FOHEC

Fibre Optics in Harsh Environments Conference

The Fibre Optics in Harsh Environments Conference is an unique European event that ensure industries in this market sector stay up-to-date with current practices and recent developments. Building on previous success this years conference will be held over two days and will cover additional topics. This year there is also an evening networking event planned for the 18th May 2010.

What topics will be covered?

- Design Tools
- Repair and Maintenance
- Current Applications
- Testing and Validation
- *NEW* Optical Coatings
- Platform Experiences
- Training
- Future Technologies
- Systems Integration
- *NEW* Fibre Sensing

Who should attend?

The conference is suitable for all people who have an interest in fibre optics and optical coatings in the harsh environment and presents excellent networking opportunities.

What does it cost?

The conference is **free** to all attendees!
Details on how to buy tickets for the evening event will be released shortly.

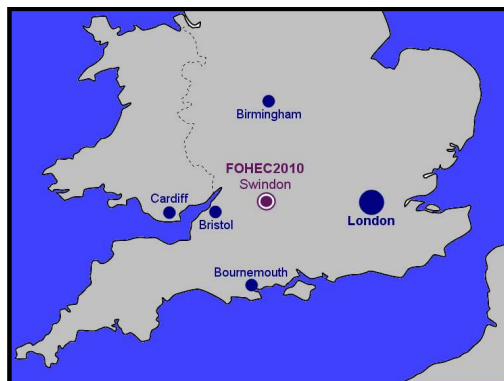

How do I register?

To register and find the latest information please visit the website at WWW.FOHEC.CO.UK

Places are limited so book early to avoid disappointment.

Where is it?

This year FOHEC'10 will be held at the STEAM museum in Swindon.
